

About the Book:

Not since Edgar March Crookshank published History and Pathology of Vaccination, A Critical Inquiry, Volume 1 in 1889 has anyone compiled the unvarnished truth about vaccines as Weapons of Mass Destruction.

Patrick Jordan shows how ‘medicine’ developed from 6000-year old Black Magic into a pseudo-scientific application of the same superstition of Blood Sacrifice today. It begins with an examination of kidney disease precipitated by Vaccination and expands on the total systemic destruction of *all forms* of connective tissue in the unique postulate of Chronic Serum Sickness as an astoundingly plausible explanation for ALL diseases in North America. Inspired by the groundbreaking work of **Dr. Rebecca Carley, M.D.** and in collaboration with veterinarian **Dr. Patricia Jordan, D.V.M.** (no relation) a universal view is developed of Planet-wide vaccine poisoning including humans, animals and the food supply. The book details by what complex biological mechanisms it actually causes damage. Sound science with in-text references mixed with personal opinion and conjecture take the militarized vaccine holocaust out of the Occulted Darkness into the Brilliant Sunlight so that even the common man and woman can see the evil for what it is. **Ingredients lists** and extensive **Timelines** graphically fill out what words lack in conveying the overwhelming scope of the assault on humanity. Facts are shown so that you can see The Big Picture. The Big Picture is always lost unless seemingly unrelated historical and biological events are contrasted by historical and biological causal mechanisms. 246 pages with Index.

About the Author: Patrick Jordan is an independent researcher specializing in Meta-analysis. He holds no degrees, is not a doctor and does not give medical advice. Extensive background in multiple industries, world travel, self-study and academic study allows for a Renaissance interpretation of the world that is not biased by the need to regurgitate disinformation in order to obtain degrees or rank. Patrick consumed over 100 scholarly works and 1.7 gigabytes of data to produce just this first in a series of volumes on Vaccine Induced Disease, also drawing from 30 years of abuses in the ‘medical’ system causing 30 years of research.
